Firetrace's E4 Total Flooding systems take full advantage of 3M® Novec® 1230's unique characteristics rather than simply conforming to Halon conventions from the 1980s. E4's innovative approach allows the use of lower-cost, low pressure equipment while achieving the performance of more costly high-pressure systems.

## MIRCOM

STAND  
SA-B45

### Peer-to-peer network communications

With Mircom solutions, you'll get a faster and more accurate emergency response, with 3D campus visualisation, that can be customised to each unique application. Designed for peer-to-peer network communications, Mircom's FleX-Net allows for a maximum of 63 nodes, while providing reliability, flexibility and expandability.

Mircom's Open Graphic Navigator (OpenGN) is an award winning graphics-based building systems monitoring tool that gives unprecedented 3D visualisation of on premise emergencies. Working in harmony, Mircom's FleX-Net and OpenGN provide a sophisticated life safety solution to meet the demands of any large campus or complex application.
